

Business Analyst

We have an opening for a Business Analyst who will define and document business requirements. The applicant will be asked to create effective product features that meet the business needs of our company. This process may include graphic design, interaction design, system design, market/competitive research and client interviews. The applicant will also be responsible for managing the implementation process which may include managing the schedule of a project.

Requirements:

- HS diploma or equivalent required; Bachelors Degree in CIS or related field preferred
- PMP certification preferred
- 2+ years experience as a business analyst working on software technologies
- Ability to document Functional Requirements, system design specifications and Use Cases for software products
- Ability to quickly understand the business issues and data challenges of client's organization and industry.
- Prior experience in creating and editing requirements, specifications, business processes and recommendations related to proposed solution.
- Ability to present status and other relevant information in format appropriate for upper management
- Ability to facilitate team and client meetings.
- Possesses understanding in the areas of application programming, database and system design.
- Understands Internet, Intranet, Extranet and client/server architectures.
- Understands how legacy and web-based systems interface with each other.
- Proven ability to resolve conflict, be it among competing business drivers or be it interpersonal
- Knowledgeable in working through the Software Development Lifecycle while focusing on product requirements
- Experience with risk management to track and monitor risks to mitigate unforeseen problems
- Excellent writing and communication skills
- Project Management Methodology

We offer excellent benefits and a casual work environment. Please fax resume with salary history to 703-818-9177 Attn: HR or email jsajobs@jspargo.com. You may visit our web site at www.jspargo.com.
