

# 2008 RABIES ANTIBODY TITER TESTING

Friday, October 17 | 2:30pm – 6:30pm

The WWVC Board of Directors, in cooperation with the Department of Agriculture Animal Disease and Food Safety Lab in Reno, Nevada, is coordinating the collection and submission of serum samples from previously immunized veterinarians and their staff to be tested for rabies virus neutralizing antibodies. Blood sample collection will be conducted on October 17 between 2:30pm and 6:30pm at the Wild West Veterinary Conference in Reno, Nevada. The Advisory Committee on Immunization Practices (ACIP) recommends that individuals who have received rabies pre-exposure vaccination, and continue to be at risk for exposure to rabies, have their titer checked every two years.

Blood samples will be processed with assistance from Department of Agriculture Animal Disease and Food Safety Lab in Reno, Nevada and submitted to the diagnostic laboratory of the College of Veterinary Medicine at Kansas State University. The WWVC Board of Directors is acting only as an intermediary to facilitate specimen collection. Questions about testing procedures should be directed to the lab at Kansas State (785) 532-4483

The cost of this service is \$50, and results (exact end point titer) should be available in three to four weeks. The results will be reported back and mailed individually to those tested.
